

Hi,

I am looking for someone to come up with some logo ideas for my site.

I have attached some ideas of my logo...

And would like for you to re-create my idea, as well as, those of your own.

The files shall be small enough to fit on business cards and picture profiles...

And large enough to fit the whole desktop wallpaper and on t-shirts clearly...

The purpose of the site, is to tell the world who you love.

The purpose of the logo is to support that purpose.

The logo(s) will be different depending on the function of each page of my site:

For example:

Frontpage focus:

"Tell the world who you love"

Profile page focus:

"My name is \_\_\_\_\_ and I love \_\_\_\_\_"

Badge: To paste this logo onto other sites, like myspace/facebook profiles or blogs like blogger.

Product wanted:

logos of different sizes and type (jpg, png, pdf)

each part of a logo as a separate file

each part of a logo in one single file

Multiple logos

Budget: \$30

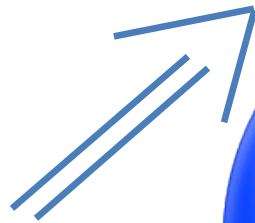

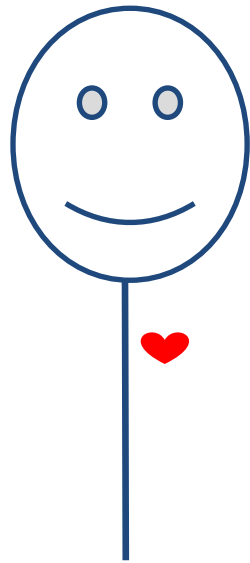

Will pay to the first person who send me the best logo designs according to my specifications.

Good Luck,

Stuart

Ps. The site will be call who-i-love.com

**Tell the world  
who you love**

[who-i-love.com](http://who-i-love.com)

This love is officially recognize by  
[who-i-love.com](http://who-i-love.com)

**“My name is John Becker  
and I love Kelly Murphy”**

[\[More About This Relationship\]](#)

**Official site to  
tell the world  
who you love**
